Fix List	3

## Introduction

The Microsoft Dynamics C5 2012 SP2 kernel C5 4.4.2.417 contains 2 fixes for bugs that have been reported since release of the Microsoft Dynamics C5 2012 SP2 kernel C5 4.4.2.415.

## GUI

**After upgrade to C52012 SP2 the texts do not show on all the buttons.**

Due to a bug, button texts/labels did not show on normal buttons.

This has been fixed.

## XAL

**ALT+H and ALT+S in XAL editor (code) now works in DOS OEM codepage - ALT+H and ALT+S in Notes editor now works in ANSI codepage**

When saving marked text in Notes editor to file, or text is inserted from file in Notes editor, ANSI code page is used/expected.

When saving marked text in XAL editor to file, or text is inserted from file in XAL editor, DOS OEM code page is used/expected.

Correction:

ALT+S and ALT+H in Notes editor will default to \*.txt file filter for both GUI and console.

ALT+S and ALT+H in XAL editor will default to \*.xal file filter for both GUI and console.

## Fix List

Bug Id	Title	Comment
61334	After upgrade to C52012 SP2 the texts do not show on all the buttons.	Fixed
61339	When marking a line in XAL code with Alt+A and then saving it with Alt+S it should save with *.XAL file filter.	Fixed

Microsoft Dynamics is a line of integrated, adaptable business management solutions that enables you and your people to make business decisions with greater confidence. Microsoft Dynamics works like and with familiar Microsoft software, automating and streamlining financial, customer relationship, and supply chain processes in a way that helps you drive business success.
